PROFESSIONAL

THE AiOX PROFESSIONAL

Welcome to the world of extraordinary mat board cutting. For the first time in the evolution of computerized cutting machines, the Professional version of the GUNNAR AiOX product family offers the most efficient capabilities for the picture framing industry. Swiss quality and precision for every picture framer. That's our promise.

MAIN APPLICATIONS

Frame shops and framing businesses with the aim of cutting mat boards in large scale production, highly precise, fast, very efficient, computer-assisted and sustainable cost-efficient.

PRODUCT CHARACTERISTICS

- Two separate, fully synchronised cutting heads for independent, highly efficient 45° and 90° cuts
- Automatic blade depth adjustment DBD for V-grooves and double mats
- No tool change, complete mat board production, including inside and outside cuts as well as v-grooves and decorative cuts in one uninterrupted process
- Cutting edge to edge to maximise mat board usage with unique button finger clamps and optional vacuum bed
- Tool-less blade change within seconds
- Perfect cut results for all boards guaranteed up to 3.5 mm thickness and up to 5.0 mm thickness for foamboards with the 90° cutting head
- Simple and intuitive operation thanks to comprehensive and in-house developed GMC operating software
- Revolutionary modular, compact and modern system design and completely flat table

MODEL VARIANTS AND TECHNICAL DETAILS

GUNNAR AiOX Professional M

Maximum board dimensions [cm]	105 x 126
Maximum positioning speed [mm/s]	1000
Maximum cutting speed [mm/s]	800
Product warranty	400'000 openings or 2 years

GUNNAR AiOX Professional XL

Maximum board dimensions [cm]	126 x 186
Maximum positioning speed [mm/s]	1000
Maximum cutting speed [mm/s]	800
Product warranty	400'000 openings or 2 years

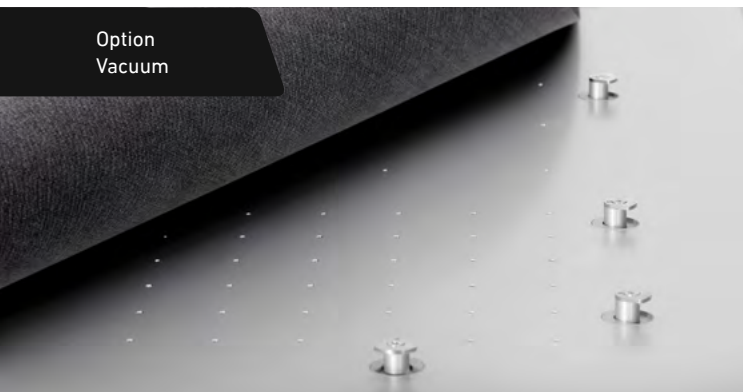

CONFIGURATION OPTIONS

- Vacuum table – for contactless and overall fixation of the board
- COE (dual zone cutting), simultaneous cutting on two work surfaces, for XL Version only, not available as vacuum option
